

VOICE, VIDEO & DATA TECHNOLOGY FOR **SAFER ENVIRONMENTS**

WHEN IT MATTERS MOST,
THIS IS WHAT SAFETY LOOKS LIKE

Motorola Solutions' technology ecosystem unifies voice, video, data and analytic solutions into a single platform that provides the foundation for safety and security and your ability to quickly respond to everyday challenges. The Safety Reimagined Ecosystems can even connect you with local first responders to give them eyes and ears on the situation before they arrive on the scene.

For 75 years, ERS Wireless has delivered mission-critical and business-critical wireless technology for public safety agencies, communities and enterprises across Indiana and recently across northern Kentucky. Whether it's creating an interoperable solution for a public safety agency, enabling a wide-area radio system, or a deploying a video surveillance and access control solution, ERS Wireless is uniquely positioned in the design, installation and maintenance the right solution for your needs.

DETECT: Detection Solutions

Know what is happening with the latest insights and intelligence.

Tip Submit: Employees or students can provide anonymous alerts anytime, anywhere from a phone or laptop.

Video Security: Capture key details and enhance visibility across facilities with specialized cameras for every location, including large interiors, hallways, stairwells and parking lots.

License Plate Recognition: The latest camera technology monitors threat-designated vehicles on premises.

Access Control: Manage employees and visitor access to buildings or restricted areas with instant detection at access points

Watchlist Reporting: Create a watchlist and keep an eye on perimeters and people of interest.

Smart Sensor Detection: Smart sensors detect chemicals, vaping, THC and other airborne substances - automatically alerting staff of incidents on the device of choice.

Concealed Weapons Detection: Artificial intelligence and advanced sensors detect a wide range of concealed weapons and threats and immediately alert security.

ANALYZE: Analytic Solutions

Turn unknowns into insights with analytics that help you take informed action.

Appearance Search: Find and track who you're looking for with video searches using specific physical descriptions such as gender, age, clothing and facial characteristics.

Identity Search: Map movements of people of interest with scanned credential badge activity.

Unusual Motion Detection: Identify a typical-events with artificial intelligence designed to flag unusual motion or activity.

Focus of Attention: Color-coded hexagons highlight potentially critical video activities so you can focus your attention and determine where action is required.

Self-Learning Analytics: Focus your attention where it matters most by monitoring properties 24/7 with integrated analytics that detect situational and abnormal activity and send proactive real-time notifications.

COMMUNICATE: Communication Solutions

Integrated communications solutions enhance school safety and improve efficiencies.

MOTOTRBO Two-Way Radios: Connect your entire operation and communicate effectively and efficiently with MOTOTRBO two-way radios for wide-area voice and data communications, providing the latest digital technology for instant connection.

Radio Alerts: Receive critical audio and visual alerts with automated video analytics dispatched directly to your two-way radios via text or text-to-voice.

WAVE Push-To-Talk Communications: Connect anyone on any device by extending your two-way-radio reach to smartphones, tablets and laptops.

Ally Incident Management and Mass Notifications: Manage and customize incident records and video from any web-enabled device to support proactive planning decisions. Keep everyone informed before, during and after critical events with integrated communications, automated text alerts, emails and voice messages.

RESPOND: Response Solutions

Respond quickly, efficiently and effectively with real-time intelligence and action plans.

ALLY Dispatch: Connect teams and communicate across devices and locations with security software that simplifies and standardizes your dispatch processes.

Command Central Aware: Real-time video and direct connection between your facility and local law enforcement providing eyes on the scene for a more informed response.

P25 Mission-Critical Communications: Connect seamlessly and enable interoperability between your security personnel and local law enforcement to ensure a rapid response.

Critical Connect: Establish real-time communication with law enforcement and improve coordination in major incidents with connection between two-way radios and smart phones.

Access Control for Emergency Response: Empower immediate first response, manage ingress/egress points at anytime from anywhere and get real-time location information.

ERS Wireless is one of Motorola Solutions Platinum and Premier Service Elite Partners, and we take great pride in the ongoing re-certification and specialization of our sales, service and engineers. As one of Motorola Solutions first Safety Reimagined Badged Partners in the country, we have already deployed solutions to help schools and enterprises in their ability to detect, analyze, communicate and respond to issues and achieve their goals of instituting safer environments.

From video security to access control to motion detection to mass notifications and more, our comprehensive solutions and services are all about safety and security. At the heart of Safety Reimagined is Orchestrate, a secure cloud-based workflow automation solution designed for your unique safety and security ecosystem. Orchestrate is an interface tool that sources data from all your voice, video and software applications, integrates the data into seamless workflows, and initiates the appropriate response and procedures to meet your safety needs. As a secure cloud-based technology platform that Orchestrate users can access solutions from anywhere, at any time.
