

# CLEANING AND DISINFECTING RADIOS & ACCESSORIES

RECOMMENDATIONS FOR RADIO, BODY-WORN CAMERA, AND ACCESSORY CARE

592 W Perry Road Ligonier, Indiana 46767 | 800 - 475 - 3320 | [www.erswireless.com](http://www.erswireless.com)

Below are the Motorola Solutions recommended cleaning guidelines for radios, body-worn cameras, and accessories.

## CLEANING

1. Apply 0.5% detergent-water solution with a cloth.
2. Use a stiff, non-metallic, short-bristled brush to work loose dirt away from the device.
3. Use a soft, absorbent, lintless cloth or tissue to remove the solution and dry the device.

## DISINFECTING

1. Wipe device down with over-the-counter isopropyl alcohol (rubbing alcohol) with at least 70% alcohol concentration.
2. Alcohol should never be applied directly to the device. Apply to a cloth, then wipe down the device.
3. The effects of certain chemicals and their vapors can have detrimental effects on plastics and the metal platings.
