CRITICAL COMMUNICATION AND COLLABORATION

RAVE
MOBILE SAFETY

Purpose-built to enable emergency and operational notifications, critical data sharing and response coordination.

From planned events to crisis scenarios, the Rave Platform provides timely and targeted communication, interconnects public, private and 9-1-1 response teams, delivers personal safety applications, and enhances emergency preparedness and response.

Higher Education security professionals rely on Rave to ensure campus safety, manage critical incidents and optimize emergency response by:

1. Delivering critical campus communication
2. Empowering students, faculty, staff and visitors
3. Providing the right information to the right people

MOBILE SAFETY

CRITICAL COMMUNICATIONS

Empower your campus community by delivering the information they need, when they need it.

Whether an emergency or routine update, share critical communications with your staff, facility, students, and visitors to keep everyone informed and actionable.

> *We are **taking the mystique away from emergency notifications and we use Rave for crisis communications**. It's what we call 'the secret sauce'. We use Rave for a full litany of other ways. We utilize it to **get crisis communications out to everyone**."*

MUSC
Medical University of South Carolina

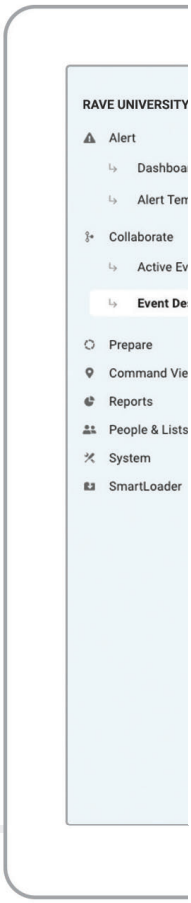
BRYAN WOOD
EMERGENCY MANAGER
MEDICAL UNIVERSITY OF SOUTH CAROLINA

CRISIS MANAGEMENT

Provide tactical support and task tracking at the beginning of your response to connect and communicate with command teams, staff, first responders, 9-1-1 and the public throughout the duration of an event.

Prepare for both planned (e.g., drills, standard operating procedures) and unplanned (e.g., severe weather, active assailant) events to enhance situational awareness and better coordinate response.

Digitize your multi-page risk plans, three-ring binders, or shared docs to visualize the appropriate actions as a series of tasks and what, and who, is required to complete them.



> *With Rave, we can **easily share responsibility for a faster emergency response**. It's like we're proactively reacting to events through the ability to **preassemble everything and automatically get it to the right people when it's needed**. That means a quick reaction can always happen, even if I'm not there."*

SAFETY & PROTECTION

Help your campus feel safe and always connected, no matter their location, with direct access to the resources they need in the palm of their hands.

Provide students and staff with a personal safety app that instantly connects with campus security and provides an outlet to confidentially share concerns or suspicious activity.

> *"We were looking for something whereby the students can communicate directly with our police headquarters and relay information. We selected Rave because of the ability to text and they can call directly to our university police headquarters."*
