Workforce Language Translation Integration for Radio Communications

During a busy shift, one misunderstood instruction can mean rework, downtime, poor customer satisfaction, or a safety incident.

When your team speaks more than one language, that risk is higher, and radio calls leave little room to repeat yourself.

You can now have a workforce language translation app on the MOTOTRBO™ radios that you already use! This integration allows you to transcript , translate and also offers a Gen-AI Virtual dispatcher.

TRANSCRIPTION

Every Call, in writing
- Searchable Record
- Live on any screen

TRANSLATION

Staff hear in their language
- 1 language per talkgroup
- Same radios = no retraining

VIRTUAL DISPATCHER

AI on the channel
- Ask, log, and send by voice
- Texts in, replies out

Why ERS Wireless

As a Motorola Solutions Platinum Channel Partner and Premier Service Partner, we offer the full line of Motorola Solutions voice, data, and video technology and the services to support those products.
